MULTIMEDIA DIGITAL PODIUM

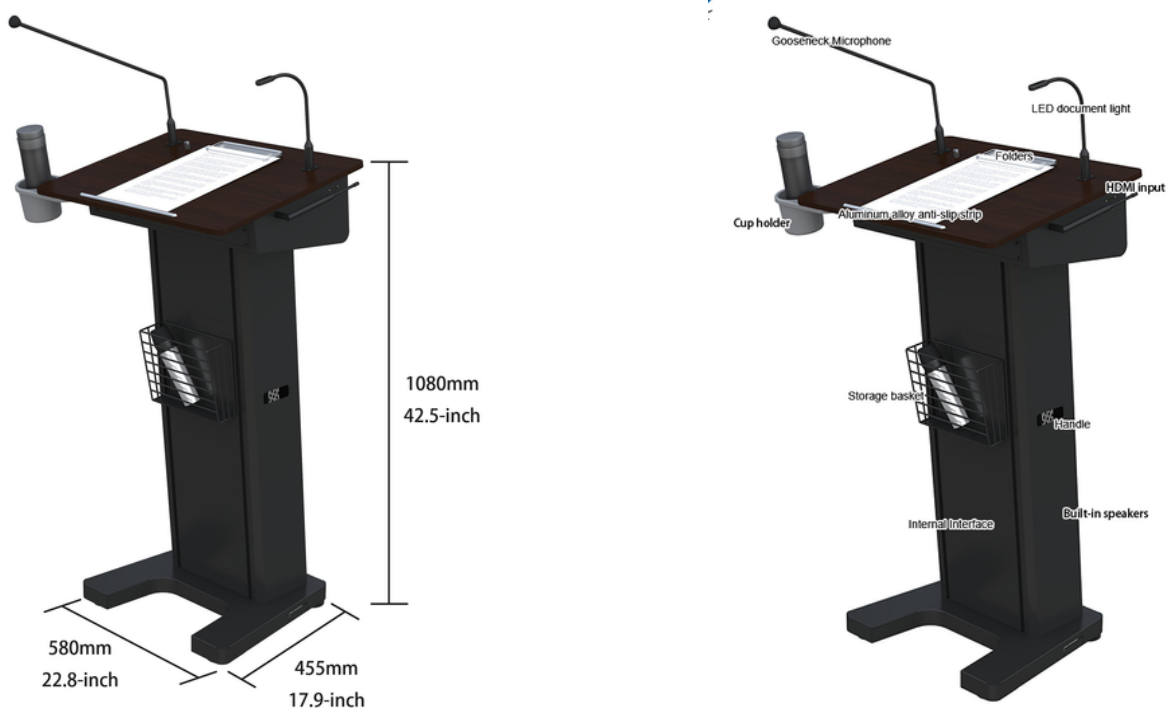

Model Number :RLST600

This multimedia digital podium, a product from RGB Logic AV Equipment Corporation, is designed for versatility, making it an ideal choice for various settings such as conference rooms, classrooms, and churches. Its sleek and modern design is complemented by a range of features that enhance its functionality and user experience, making it a comprehensive solution for any presentation environment.

Physical Specifications

The podium boasts a robust construction, with dimensions of 580x420x1100mm and a substantial weight of 30KG, ensuring stability during use. It is crafted from a combination of 12mm medium density fiberboard and 1.0-2.0mm cold-rolled steel, materials known for their durability and resilience. The elegant black finish gives it a professional and sophisticated appearance, suitable for any formal setting. For ease of mobility, the podium is equipped with two handles, one on each side, allowing for convenient repositioning. To ensure its safe delivery, the product is packaged in a sturdy honeycomb carton, which includes a wooden pallet for added protection during transit.

Technical Specifications

In terms of technical capabilities, the podium is well-equipped to handle modern multimedia requirements. It features an input interface with one HDMI port, allowing for high-definition video and audio connections, and one audio port for additional sound inputs.

The integrated amplifier is a key component, boasting an impressive output power of 260W, which is more than sufficient to fill a large room with clear and powerful sound. This combination of connectivity and audio power makes the podium a self-sufficient and powerful tool for any public speaking engagement.

Desktop and Storage

The user-focused design is evident in the desktop's 10° angle, which provides an ergonomic surface for presenters. The desktop is fully equipped with a suite of integrated tools to facilitate seamless presentations, including a high-quality gooseneck microphone for clear audio projection, an LED reading light for optimal visibility in any lighting condition, a file clamp to securely hold documents, and an aluminum alloy anti-slip strip to prevent items from sliding off. Furthermore, the podium includes a standard cup holder for convenience and a storage basket, offering ample space for storing presentation materials and personal items.

Key Features and Benefits

This multimedia podium stands out as an all-in-one solution that streamlines the presentation experience. The integration of a microphone, reading light, and essential ports like HDMI eliminates the clutter of external wires and equipment, creating a more organized and professional setup. The powerful 260W amplifier is a major benefit, providing ample audio output for a variety of room sizes, from small classrooms to larger conference halls. The thoughtful ergonomic details, such as the angled desktop and included storage, are designed to enhance presenter comfort and efficiency. Its robust construction ensures long-term durability, while the handles offer practical mobility, making it a valuable and versatile asset for any organization.

Specifications

Product Size (LWH): 580x420x1100MM

Material: 12mm medium density fiberboard & 1.0-2.0mm cold-rolled steel

Color: Black

Desktop Angle: 10°

Desktop Interface: Gooseneck Microphone*1, LED reading light*1, File Clamp*1, Aluminum alloy anti-slip strip*1

Cup Holder: Standard with 1

Storage Basket: Standard with 1

Input Interface: HDMIx1, Audiox1

Amplifier Output Power: 260W

Handle: 2 Handles (One on each side)

Weight: 30KG

Packaging: Honeycomb carton (including wooden pallet)

Notes:

The model and its technology stack may evolve; future updates can introduce changes to functionality and performance.
